### Search Procedure

26. In searching for data capable of being read, stored, or interpreted by a computer or storage device, law enforcement personnel executing the search warrant will employ the following procedure:

a. *On-site search, if practicable.* Law enforcement officers trained in computer forensics (hereafter, “computer personnel”), if present, may be able to determine if digital devices can be searched on site in a reasonable amount of time without jeopardizing the ability to preserve data on the devices. Any device searched on site will be seized only if it contains data falling within the list of items to be seized as set forth in the warrant and herein.

b. *On-site imaging, if practicable.* If a digital device cannot be searched on site as described above, the computer personnel, if present, will determine whether the device can be imaged on site in a reasonable amount of time without jeopardizing the ability to preserve the data.

c. *Seizure of digital devices for off-site imaging and search.* If no computer personnel are present at the execution of the search warrant, or if they determine that a digital device cannot be searched or imaged on site in a reasonable amount of time and without jeopardizing the ability to preserve data, the digital device will be seized and transported to an appropriate law enforcement laboratory for review.

d. Law enforcement personnel will examine the digital device to extract and seize any data that falls within the list of items to be seized as set forth in the warrant and herein. To the extent they discover data that falls outside the scope of the warrant that they believe should be seized (e.g., contraband or evidence of other crimes), they will seek an additional warrant.

e. Law enforcement personnel will use procedures designed to identify items to be seized under the warrant. These procedures may include the use of a “hash value” library to

exclude normal operating system files that do not need to be searched. In addition, law enforcement personnel may search for and attempt to recover deleted, hidden, or encrypted data to determine whether the data falls within the list of items to be seized under the warrant.

f. If the digital device was seized or imaged, law enforcement personnel will perform an initial search of the original digital device or image within a reasonable amount of time not to exceed 120 days from the date the warrant is executed. If, after conducting the initial search, law enforcement personnel determine that an original digital device contains any data falling within the list of items to be seized pursuant to this warrant, the government will retain the original digital device to, among other things, litigate the admissibility/authenticity of the seized items at trial, ensure the integrity of the copies, ensure the adequacy of chain of custody, and resolve any issues regarding contamination of the evidence. If the government needs additional time to determine whether an original digital device or image contains any data falling within the list of items to be seized pursuant to this warrant, it may seek an extension of time from the Court within the original 120-day period from the date the warrant is executed. The government shall complete the search of the digital device or image within 180 days of the date the warrant is executed. If the government needs additional time to complete the search, it may seek an extension from the Court.

g. If, at the conclusion of the search, law enforcement personnel determine that particular files or file folders on an original digital device or image do not contain any data falling within the list of items to be seized pursuant to the warrant, they will not search or examine those files or folders further without authorization from the Court. Law enforcement personnel may continue to examine files or data falling within the list of items to be seized pursuant to the warrant, as well as data within the operating system, file system, or software application relating or pertaining

to files or data falling within the list of items to be seized pursuant to the warrant (such as log files, registry data, and the like), through the conclusion of the case.

h. If an original digital device does not contain any data falling within the list of items to be seized pursuant to this warrant, the government will return that original data device to its owner within a reasonable period of time following the search of that original data device and will seal any image of the device, absent further authorization from the Court.

STATE OF OREGON                     )  
  ) ss:                     AFFIDAVIT OF CLINTON LINDSLY  
County of Multnomah                )

**Affidavit in Support of a Search Warrant**

I, Clinton Lindsly, being duly sworn, do hereby depose and state as follows:

**Introduction and Agent Background**

1. I have been employed as a Special Agent (SA) by the U.S. Department of Homeland Security (DHS), Immigration and Customs Enforcement, Homeland Security Investigations (HSI) since August 2010. I am currently assigned to the child exploitation unit in the HSI office in Portland, Oregon. Previously, I was assigned to the HSI office in Los Angeles, California, where I worked for over six years in a money laundering and narcotics group that specialized in undercover operations. In 2018, I transferred to HSI Portland and continued to specialize in money laundering and narcotics investigations until January 2020. My formal law enforcement training includes successfully completing the 23-week HSI basic training course at the Federal Law Enforcement Training Center in Glynco, Georgia. During that training, I learned how to conduct child exploitation investigations. Since then, I have conducted numerous child exploitation investigations and have assisted federal and state partners with their child exploitation investigations. As such, I have become familiar with ways that child pornography is shared, distributed, and/or produced, including the use of various social media websites (Facebook, Twitter, Kik, Snap Chat, Discord, etc.), “cloud” based storage, peer-to-peer (P2P) networks, and Internet Relay Chat (IRC). I have also become familiar with jargon or slang terms that people involved in child exploitation will use to discuss their activities. Additionally, I have become familiar with how child pornography is sold, traded, and distributed

on the “dark net,” often being purchased with digital currency such as Bitcoin, Ripple, and others.

2. I have been the case agent for numerous investigations involving the sexual exploitation of children or the distribution, receipt, and possession of child pornography, and have assisted in many other investigations. I have participated in searches of premises and assisted in gathering evidence pursuant to search warrants, including search warrants in multiple child pornography investigations. I have participated in interviews of persons identified as possessing and distributing child pornography. I have also participated in investigations involving online predators that are attempting to have sex with children.

3. I submit this affidavit in support of an application for a warrant authorizing searches of the person of **John MIDDENDORP**, including any cell phones on his person, and his residence located at 11575 SW Greenburg Road Apt. 12, Tigard, OR 97223 (the “**Subject Premises**”) for evidence, fruits, and instrumentalities of violations of 18 U.S. Code § 2250(a) (Failure to Register), 18 U.S.C. §§ 2251(a) and (e) (Attempted Sexual Exploitation of a Child), and 18 U.S.C. § 1470 (Attempted Transfer of Obscene Material to a Minor) (the “**Target Offenses**”). As set forth below, I have probable cause to believe that **MIDDENDORP** committed those offenses, and that evidence of those offenses will be found on his person (including on any smartphone or other mobile device on his person) and at his residence.

4. This affidavit is intended to show only that there is sufficient probable cause for the requested search warrant and does not set forth all my knowledge about this matter. The facts set forth in this affidavit are based on my own personal knowledge, knowledge obtained from other individuals during my participation in this investigation, including other law

enforcement officers, a review of records related to this investigation, communications with others who have knowledge of the events and circumstances described herein, and information gained through my training and experience.

**Applicable Law**

5. *Title 18, United States Code, § 2250(a)* makes it a sex offender who is required to register under the Sex Offender Registration and Notification Act (SORNA) to knowingly fail to register or update a registration as required by SORNA.

6. *Title 18, United States Code, §§ 2251(a) and (e)* make it a crime for any person to employ, use, persuade, induce, entice, or coerce any minor to engage in any sexually explicit conduct for the purpose of producing any visual depiction of such conduct or for the purpose of transmitting a live visual depiction of such conduct, if such person knows or has reason to know that the visual depiction will be transported or transmitted using any means or facility of interstate or foreign commerce or in or affecting interstate or foreign commerce or mailed, if the visual depiction was produced or transmitted using materials that have been mailed, shipped, or transported in or affecting interstate or foreign commerce by any means, including by computer, or if the visual depiction has actually been transported or transmitted using any means or facility of interstate or foreign commerce or in or affecting interstate or foreign commerce or mailed, or to attempt to do so.

7. *Title 18, United States Code § 1470* makes it a crime for any person, using the mail or any facility or means of interstate or foreign commerce, to knowingly transfer obscene

matter to another individual who has not attained the age of 16 years, knowing that such other individual has not attained the age of 16 years, or to attempt to do so.<sup>1</sup>

### **Statement of Probable Cause**

#### **Summary - Undercover Account Contacted by MIDDENDORP**

8. On March 2, 2022, Homeland Security Investigations (HSI) Stockton Special Agent (SA) Peter Evans contacted me about an online predator identified as John **MIDDENDORP**, who is a registered sex offender in the state of California. **MIDDENDORP** was convicted in 2009 of Lewd or Lascivious Act with a Minor Child Under 14 Years of Age in violation of California state law. Based on my review of records on the California Sex Registry database, **MIDDENDORP** was incarcerated for approximately five years and was released from prison in 2014. **MIDDENDORP's** post-prison supervision ended on approximately December 24, 2021. Based on this, it appears that **MIDDENDORP** has barely been off government supervision for two months before re-engaging with a purported underage child using the internet.

9. On March 2, 2022, **MIDDENDORP** contacted an undercover Facebook account and was immediately told by the law enforcement officer responsible for the account that the user of the account was only 16 years old. **MIDDENDORP** then asked the user if she was a

<sup>1</sup> Currently, obscenity is evaluated by federal and state courts alike using a tripartite standard established by the Supreme Court in [Miller v. California](#). The Miller test for obscenity includes the following criteria: (1) whether the average person, applying contemporary community standards would find that the work, taken as a whole, appeals to prurient interest; (2) whether the work depicts or describes, in a patently offensive way, sexual conduct specifically defined by the applicable state law; and (3) whether the work, taken as a whole, lacks serious literary, artistic, political, or scientific value.

virgin and attempted to video-chat with her. **MIDDENDORP** then sent an image of a male with an erect penis, which **MIDDENDORP** claimed was him. Over the next several days **MIDDENDORP** continued to engage in sexually explicit conversation with the online persona and agreed to meet in person for the purposes of having sex in the District of Oregon. The undercover agent then told **MIDDENDORP** that the online persona was in fact 15 years old; **MIDDENDORP** still wanted to meet in person to have sex. **MIDDENDORP** was told at least five times that the online persona was only 15 years old, but he continued to engage in sexually explicit conversations with the girl. In fact, he sent a video of himself naked before getting in the shower and asked the undercover agent to join him in the shower by video chat. **MIDDENDORP** made several requests for the undercover to send him sexually explicit photographs of herself. **MIDDENDORP** told the online persona, who he believed was a 15-year-old girl, that he wanted to “rape” her when they met in person and that he has raped other people.

Undercover Facebook Account Discussion

10. The undercover Facebook account is maintained by Detective Casey Cooper of the Stanislaus County, California, Sheriff’s Department (SCSD). Detective Cooper’s undercover persona claimed to be in Turlock, California. No age is displayed in the profile. The profile picture is a partial photograph of a female (from her neck down to her waist) wearing a t-shirt. There are two other pictures depicting the same female – one standing with a horse and the other sitting by a swimming pool wearing a bathing suit. The female in all three pictures is a sworn law enforcement officer who is over the age of 18, and who consented to the use of her photographs in the undercover Facebook account.

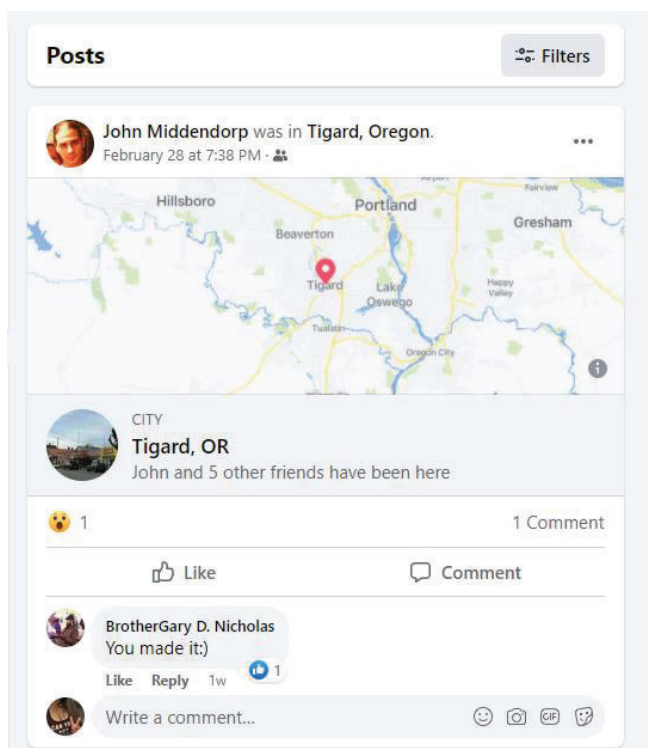

11. The Facebook account that contacted Detective Cooper's undercover account was in **MIDDENDORP's** name and displayed several pictures of **MIDDENDORP**.<sup>2</sup> Detective Casey was familiar with **MIDDENDORP's** name and appearance from a previous investigation of **MIDDENDORP** engaging in sexual conduct with a child under the age of 14, which resulted in the conviction described above. During my review of **MIDDENDORP's** Facebook page, I observed **MIDDENDORP** had "checked-in" at several places in Portland / Tigard on February 28, 2022, with one comment reading "You made it." Additionally, **MIDDENDORP's** Facebook account purported that he lives in "Tigard, Oregon." On March 8, 2022, I searched the Oregon State Police's (OSP) sex offender registry website for **MIDDENDORP's** name. I did not see that he had registered yet which would be at least nine calendar days after moving to Oregon, in violation of SORNA.<sup>3</sup> Additionally, I spoke with OSP Administrative Specialist Eusebio Bermea of the Sex Offender Registration Section who confirmed that no record of **MIDDENDORP** reporting in person or by phone his new domicile status to OSP had been completed yet. A screenshot of "check-ins" and where **MIDDENDORP** purports to "live" on his Facebook account is below:

---

<sup>2</sup> The Facebook account that contacted the undercover account was identified as <https://www.facebook.com/john.middendorp.5>.

<sup>3</sup> The Oregon State Police Sex Registration website states that they only provide public facing information on "Level 3 Sex Offenders." Based on my assessment of **MIDDENDORP's** underlying criminal conviction and my review of available literature, I believe that **MIDDENDORP** is a "Level 3 Sex Offender" as defined by Oregon law.

 Lives in Tigard, Oregon

12. Additionally, according to my review of his California “Parolee Face Sheet,” **MIDDENDORP** was assigned the highest classification number under the California Static Risk Assessment (CSRA) with a number of “5.” According to the California Code of Regulations, a CSRA risk number value of “5” means “High Risk Violence,” which means that “the offender has a greater risk of reoffending with a violent offense.”

13. Detective Cooper engaged in a limited online discussion with **MIDDENDORP**, who told Detective Cooper that he lived in Tigard, Oregon. As a result, Detective Cooper contacted HSI SA Evans, who in turn contacted me. **MIDDENDORP**’s initial contact with Detective Cooper’s undercover account is documented under SCSD Case #S22006918.

14. I took control of the undercover account on March 2, 2022, at approximately 7:32 p.m., and continued online conversations with **MIDDENDORP**. I turned the undercover account over to HSI Newark SA Isidro Cruz, who controlled it between March 3-4, 2022. On

March 4, 2022, at approximately 11:42 p.m., I resumed control of the undercover account.

During this investigation, HSI SA Erin Herrgott engaged in several undercover video chats with **MIDDENDORP**, during which SA Herrgott posed as the user of the undercover account.

Those video chats were audio and video recorded. Because various agents played the role of the online persona at different times, I will collectively refer to the agents (including myself) as “the persona” and the persona as “she” in this affidavit.

*MIDDENDORP Attempts to Transfer Obscene Material to a Minor and Requests Sexually Explicit Photographs*

15. During various online conversations with the undercover account persona, **MIDDENDORP** engaged in sexually explicit conversations and sent obscene material while believing the persona of the account was a 16-year-old girl. **MIDDENDORP** stated that he wanted to meet the persona for the purpose of having sex and gave the persona his home address, which is the **Subject Premises**. During these chats, and because the persona wanted to be “honest” about her age, the persona told **MIDDENDORP** that she was actually 15 years old. **MIDDENDORP** then immediately stated “That’s ok,” “Ya I’ll meet,” sent his home address (the **Subject Premises**), and stated “If you make it Tuesday morning at the apartment it’ll work.”

16. The persona told **MIDDENDORP** at least five times that she was only 15 years old. The persona frequently referenced her “mom.” **MIDDENDORP** sent the persona pictures of his erect penis and a video of himself naked before getting in the shower. He first sent the persona an image of his erect penis when he believed the persona was 16 years old, then “unsent” the image before agents could capture and save it. After the persona told him she was only 15, **MIDDENDORP** sent her a video of himself naked getting in the shower, and asked the persona to video chat and join him in the shower. **MIDDENDORP** also told the persona to not

share the photographs or tell anybody about them. **MIDDENDORP** appears to believe that he is in a “relationship” with the persona, and frequently told the persona, “I love you.”

17. On at least one occasion, **MIDDENDORP** asked the persona to touch herself and then immediately attempted to video chat with the persona. **MIDDENDORP** attempted to video chat approximately 30 times. The undercover agent posing as the persona sent several benign pictures of herself to **MIDDENDORP**. **MIDDENDORP** told the agent that he “saved all of them,” consistent with saving them to his cell phone.

18. **MIDDENDORP** told the persona, both by text and in video chat, that he wanted to “rape” her. A transcript of the chat logs (dated March 2-7, 2022) and a summary of the video chats in chronological order are attached as EXHIBIT 1 and are fully incorporated herein. Several excerpts follow.

*MIDDENDORP Attempted to Request Sexually Explicit Photos*

19. **MIDDENDORP** requested sexually explicit photos from the persona, who at first claimed to be 16, and later 15 years of age, as follows:

a. March 3, 2022 – **MIDDENDORP** directs the persona to take pictures of her “pussy and ass”:

When the undercover asked if he would meet her at the mall, MIDDENDORP stated “maybe.” When asked by the undercover if they were going to make love, MIDDENDORP stated “no” and started laughing. MIDDENDORP stated that he thought she was going to show him her “panties” today. <b>MIDDENDORP stated that she could show him her “privates.”</b> The undercover asked “right now?,” to which MIDDENDORP stated “ya right now.” When asked what private parts he wanted her to show him, MIDDENDORP stated “all of them.” MIDDENDORP asked if she ever “had sex before.” MIDDENDORP then asked if anyone had “raped” her before. MIDDENDORP then asked if she would “let him rape her.” When asked if he wanted to rape her, MIDDENDORP responded by asking if she would let him. MIDDENDORP then asked several more times if she would let him rape her. When asked if he wanted to, MIDDENDORP stated “yeah.” When asked if he wanted her to show him her privates, MIDDENDORP stated “forget about it.” When asked if he wanted to “make love,” MIDDENDORP now stated “no.” MIDDENDORP again asked if she “wanted to be raped,” to which the undercover stated that she didn’t want to get pregnant.</p>

When asked if it would hurt, MIDDENDORP stated “probably” and then said, “I love you.” When asked if he still wanted to see her, MIDDENDORP stated “heck yeah” but added that he wasn’t sure if he was going to the mall to meet her. MIDDENDORP stated that she needed to wait for him and that eventually he would get a job, his own place, and that she could move in with him. When asked again if he wanted to meet on Sunday, MIDDENDORP stated that he would see what he could do and eventually stated that he would. The undercover told MIDDENDORP that her mom was dropping her off at 11. When asked what they were going to do, MIDDENDORP asked what was she “willing to do?” MIDDENDORP asked if she was “down.” MIDDENDORP stated that he thought she was going to show him her panties today. MIDDENDORP asked if she was wearing any panties and told her to show him “what she was wearing” or what she was “not wearing.” MIDDENDORP then asked several times for the undercover to show him what she was wearing. <b>MIDDENDORP stated “show me your boobs” and “alright get naked.” MIDDENDORP told the undercover to show him her “naked body.”</b></p>

*MIDDENDORP Attempted to Send Obscene Matter to a Minor*

20. As discussed above and as seen in EXHIBIT 1, **MIDDENDORP** sent obscene matter to a minor by text message, voice, and by video even after the persona told **MIDDENDORP** several times that she was 15 years of age. An example follows:

a. March 4, 2022 – **MIDDENDORP** sent a video of himself naked getting into shower and then asked the persona to join him on video chat:

[John unsent a message] – MIDDENDORP sent a video depicting himself naked standing in front of a mirror in a bathroom. It sounds like the water is running in the shower. MIDDENDORP’s penis is visible. After several seconds of standing in front of the mirror he spins the camera towards the	
---	--

shower and states "I'm about to take a shower." The video is 14 seconds in length.	
	Oh my! Have fun!
I got an idea, u can watch me while I shower, I won't say anything	
	[blush face emoji]
U don't have to either	
So u can stay on	
	My mom might walk in
Then turn it off if she does	
	I would but she's in and out of my room
Ok then give me about 30 minutes k baby	
	Ok! I'll be here

*MIDDENDORP Video Chats from the Subject Premises*

21. During at least one of the video chats, I observed **MIDDENDORP** enter and exit 11575 SW Greenburg Road Apt. 12, Tigard, OR 97223 (**Subject Premises**). I am familiar with the appearance of the apartment from conducting physical surveillance and taking a photograph of the apartment on March 3, 2022. Additionally, during the video chat with **MIDDENDORP** the number “12” could be seen next to the front door consistent with apartment number 12. I have provided a side-by-side of the photograph I took on surveillance and two still images from the video chat with **MIDDENDORP**:

*Picture of Subject Premises*

*Video Chat with MIDDENDORP*

22. Based on my training and experience, I know that Facebook messenger is commonly accessed by a cell phone. I also know that the photographs that were sent by **MIDDENDORP** appeared to be taken by a cell phone (i.e. a selfie-style image). Additionally, during the video chats it appeared that **MIDDENDORP** was holding a cell phone based on the angle and mobility of the camera. Lastly, in the video sent by **MIDDENDORP** that depicted him naked in the bathroom he was seen holding a cell phone.

23. The **Subject Premises** is an apartment or duplex located at 11575 SW Greenburg Road Apt. 12, Tigard, OR 97223. It is a wood two-story residence painted blue, with a black roof, faces north, and is located on the south side of SW Greenburg Road. The number “12” is on the west side of the front door in black lettering.

### **Search and Seizure of Digital Data**

24. This application seeks permission to search for and seize evidence of the crimes described above, including evidence of how digital devices were used, the purpose of their use, and who used them.

25. Based upon my training and experience, and information related to me by agents and others involved in the forensic examination of computers and digital devices, I know that data in digital form can be stored on a variety of systems and storage devices, including laptop computers, tablets, mobile devices, hard disk drives, floppy disks, compact disks, magnetic tapes, flash drives, and memory chips. Some of these devices can be smaller than a thumbnail and can take several forms, including thumb drives, secure digital media in phones and cameras, personal music devices, and similar items.

### **Removal of Data Storage Devices**

26. I know that a forensic image is an exact physical copy of a data storage device. A forensic image captures all data on the subject media without viewing or changing the data in any way. Absent unusual circumstances, it is essential that a forensic image be obtained prior to conducting any search of data for information subject to seizure pursuant to the warrant. I also know that during a search of premises it is not always possible to create a forensic image of or search digital devices or media for data for several reasons, including the following:

a. Searching digital devices can be a highly technical process that requires specific expertise and specialized equipment. Because there are so many different types of digital devices and software in use today, it is difficult to anticipate all the necessary technical

manuals, specialized equipment, and specific expertise necessary to conduct a thorough search of the media to ensure that the data will be preserved and evaluated in a useful manner.

b. Searching digital devices can require the use of precise, scientific procedures designed to maintain the integrity of the evidence and to recover latent data not readily apparent to the casual user. The recovery of such data may require the use of special software and procedures, such as those used in a law enforcement laboratory.

c. The volume of data stored on many digital devices is typically so large that it is generally impractical to search for data during the execution of a physical search of premises. Storage devices capable of storing 500 gigabytes to several terabytes of data are now commonplace in computers. It can take several hours, or even days, to image a single hard drive. The larger the drive, the longer it takes. Depending upon the number and size of the devices, the length of time that agents must remain onsite to image and examine digital devices can become impractical.

**Laboratory Setting May Be Essential for Complete and Accurate Analysis of Data**

27. Since digital data may be vulnerable to inadvertent modification or destruction, a controlled environment, such as a law enforcement laboratory, may be essential to conduct a complete and accurate analysis of the digital devices from which the data will be extracted. Software used in a laboratory setting can often reveal the true nature of data. Therefore, a computer forensic reviewer needs a substantial amount of time to extract and sort through data that is concealed or encrypted to determine whether it is evidence, contraband, or an instrumentality of a crime.

28. Analyzing the contents of a computer or other electronic storage device, even without significant technical difficulties, can be very challenging, and a variety of search and analytical methods must be used. For example, searching by keywords, which is a limited text-based search, often yields thousands of hits, each of which must be reviewed in its context by the examiner to determine whether the data is within the scope of the warrant. Merely finding a relevant hit does not end the review process. The computer may have stored information about the data at issue that may not be searchable text, such as who created it; when and how it was created, downloaded, or copied; when it was last accessed; when it was last modified; when it was last printed; and when it was deleted. The relevance of this kind of data is often contextual. Furthermore, many common email, database, and spreadsheet applications do not store data as searchable text, thereby necessitating additional search procedures. To determine who created, modified, copied, downloaded, transferred, communicated about, deleted, or printed data requires a search of events that occurred on the computer in the time periods surrounding activity regarding the relevant data. Information about which users logged in, whether users shared passwords, whether a computer was connected to other computers or networks, and whether the users accessed or used other programs or services during the relevant time period, can help determine who was sitting at the keyboard.

29. *Latent Data:* Searching digital devices can require the use of precise scientific procedures designed to maintain the integrity of the evidence and to recover latent data. The recovery of such data may require the use of special software and procedures. Data that represents electronic files or remnants of such files can be recovered months or even years after it has been downloaded onto a hard drive, deleted, or viewed via the Internet. Even when such

files have been deleted, they can be recovered months or years later using readily available forensic tools. Normally, when a person deletes a file on a computer, the data contained in the file does not actually disappear; rather, that data remains on the hard drive until it is overwritten by new data. Therefore, deleted files, or remnants of deleted files, may reside in space on the hard drive or other storage media that is not allocated to an active file. In addition, a computer's operating system may keep a record of deleted data in a swap or recovery file or in a program specifically designed to restore the computer's settings in the event of a system failure.

30. *Contextual Data:*

a. In some instances, the computer "writes" to storage media without the specific knowledge or permission of the user. Generally, data or files that have been received via the Internet are automatically downloaded into a temporary Internet directory or cache. The browser typically maintains a fixed amount of hard drive space devoted to such data or files, and the files are only overwritten as they are replaced with more recently viewed Internet pages. Thus, the ability to retrieve artifacts of electronic activity from a hard drive depends less on when the file was downloaded or viewed than on a particular user's operating system, storage capacity, and computer usage. Logs of access to websites, file management/transfer programs, firewall permissions, and other data assist the examiner and investigators in creating a "picture" of what the computer was doing and how it was being used during the relevant time in question. Given the interrelationships of the data to various parts of the computer's operation, this information cannot be easily segregated.

b. Digital data on the hard drive that is not currently associated with any file may reveal evidence of a file that was once on the hard drive but has since been deleted or

edited, or it could reveal a deleted portion of a file (such as a paragraph that has been deleted from a word processing file). Virtual memory paging systems can leave digital data on the hard drive that show what tasks and processes on the computer were recently used. Web browsers, email programs, and chat programs store configuration data on the hard drive that can reveal information such as online nicknames and passwords. Operating systems can record additional data, such as the attachment of peripherals, the attachment of USB flash storage devices, and times the computer was in use. Computer file systems can record data about the dates files were created and the sequence in which they were created. This data can be evidence of a crime, can indicate the identity of the user of the digital device, or can point toward the existence of evidence in other locations. Such data may also lead to exculpatory evidence.

c. Further, evidence of how a digital device has been used, what it has been used for, and who has used it, may be learned from the absence of particular data on a digital device. Specifically, the lack of computer security software, virus protection, malicious software, evidence of remote control by another computer system, or other programs or software, may assist in identifying the user indirectly and may provide evidence excluding other causes for the presence or absence of the items sought by this application. Additionally, since computer drives may store artifacts from the installation of software that is no longer active, evidence of the historical presence of the kind of software and data described may have special significance in establishing timelines of usage, confirming the identification of certain users, establishing a point of reference for usage and, in some cases, assisting in the identification of certain users. This data can be evidence of a crime, can indicate the identity of the user of the digital device, or can point toward the existence of evidence in other locations. Such data may also lead to

exculpatory evidence. Evidence of the absence of particular data on the drive is not generally capable of being segregated from the rest of the data on the drive.

### **Search Procedure**

31. In searching for data capable of being read, stored, or interpreted by a computer or storage device, law enforcement personnel executing the search warrants will employ the following procedure:

a. *On site search, if practicable.* Law enforcement officers trained in computer forensics (hereafter, “computer personnel”), if present, may be able to determine if digital devices can be searched on site in a reasonable amount of time and without jeopardizing the ability to preserve data on the devices. Any device searched on site will be seized only if it contains data falling within the list of items to be seized as set forth in the warrants and in Attachment B.

b. *On site imaging, if practicable.* If a digital device cannot be searched on site as described above, the computer personnel, if present, will determine whether the device can be imaged on site in a reasonable amount of time without jeopardizing the ability to preserve the data.

c. *Seizure of digital devices for off-site imaging and search.* If no computer personnel are present at the execution of the search warrant, or if they determine that a digital device cannot be searched or imaged on site in a reasonable amount of time and without jeopardizing the ability to preserve data, the digital device will be seized and transported to an appropriate law enforcement laboratory for review.

d. Law enforcement personnel will examine the digital device to extract and seize any data that falls within the list of items to be seized as set forth in the warrant and in Attachment B. To the extent they discover data that falls outside the scope of the warrant that they believe should be seized (e.g., contraband or evidence of other crimes), they will seek an additional warrant.

e. Law enforcement personnel will use procedures designed to identify items to be seized under the warrant. These procedures may include the use of a “hash value” library to exclude normal operating system files that do not need to be searched. In addition, law enforcement personnel may search for and attempt to recover deleted, hidden, or encrypted data to determine whether the data falls within the list of items to be seized under the warrant.

f. If the digital device was seized or imaged, law enforcement personnel will perform an initial search of the original digital device or image within a reasonable amount of time not to exceed 120 days from the date the warrant is executed. If, after conducting the initial search, law enforcement personnel determine that an original digital device contains any data falling within the list of items to be seized pursuant to the warrant, the government will retain the original digital device to, among other things, litigate the admissibility/authenticity of the seized items at trial, ensure the integrity of the copies, ensure the adequacy of chain of custody, and resolve any issues regarding contamination of the evidence. If the government needs additional time to determine whether an original digital device or image contains any data falling within the list of items to be seized pursuant to this warrant, it may seek an extension from the Court within the original 120-day period from the date the warrant is executed. The government shall complete the search of the digital device or image within 180 days of the date

the warrant is executed. If the government needs additional time to complete the search, it may seek an extension of time from the Court.

g. If, at the conclusion of the search, law enforcement personnel determine that specific files or file folders on an original digital device or image do not contain any data that fall within the list of items to be seized pursuant to the warrant, they will not search or examine those files or folders further without authorization from the Court. Law enforcement personnel may continue to examine files or data falling within the list of items to be seized pursuant to the warrant, as well as data within the operating system, file system, or software application relating or pertaining to files or data falling within the list of items to be seized pursuant to the warrant (such as log files, registry data, and the like), through the conclusion of the case.

h. If an original digital device does not contain any data falling within the list of items to be seized pursuant to this warrant, the government will return that original data device to its owner within a reasonable period following the search of that original data device and will seal any image of the device, absent further authorization from the Court.

#### **Items to Be Seized**

32. To search for data that is capable of being read or interpreted by a computer, law enforcement personnel will need to seize, image, copy, and/or search the following items, subject to the procedures set forth herein:

a. Any computer equipment or digital devices that are capable of being used to commit or further the crimes outlined above, or to create, access, or store the types of contraband and evidence, fruits, or instrumentalities of such crimes, as set forth in Attachment B;

b. Any computer equipment or digital devices used to facilitate the transmission, creation, display, encoding, or storage of data that are capable of being used to commit or further the crimes outlined above, or to create, access, process, or store the types of contraband and evidence, fruits, or instrumentalities of such crimes, as set forth in Attachment B;

c. Any magnetic, electronic, or optical storage device capable of storing data, such as thumb drives and other USB data storage devices, floppy disks, hard disks, tapes, CD ROMs, CD-Rs, CD-RWs, DVDs, optical disks, printer or memory buffers, smart cards, PC cards, memory calculators, electronic dialers, electronic notebooks, personal digital assistants, iPods, and cell phones capable of being used to commit or further the crimes outlined above, or to create, access, or store the types of contraband and evidence, fruits, or instrumentalities of such crimes, as set forth in Attachment B;

d. Any documentation, operating logs, and reference manuals regarding the operation of the computer equipment, storage devices, or software;

e. Any applications, utility programs, compilers, interpreters, and other software used to facilitate direct or indirect communication with the computer hardware, storage devices, or data to be searched;

f. Any physical keys, encryption devices, dongles, or similar physical items which are necessary to gain access to the computer equipment, storage devices, or data;

g. Any passwords, password files, test keys, encryption codes, or other information necessary to access the computer equipment, storage devices, or data; and

h. All records, documents, programs, applications, or materials created, modified, or stored in any form, including in digital form, on any computer or digital device, that

show the actual user(s) of the computers or digital devices during any time period in which the device was used to upload, download, store, receive, possess, or view child pornography, including the web browser's history; temporary Internet files; cookies, bookmarked or favorite web pages; email addresses used from the computer; MAC IDs and/or Internet Protocol addresses used by the computer; email, internet relay chat, instant messages, and other electronic communications; address books; contact lists; records of social networking and online service usage; usernames or screen names; and software that would allow others to control the digital device such as viruses, Trojan horses, and other forms of malicious software.

#### **Retention of Image**

33. The government will retain a forensic image of each electronic storage device subjected to analysis for a number of reasons, including proving the authenticity of evidence to be used at trial; responding to questions regarding the corruption of data; establishing the chain of custody of data; refuting claims of fabricating, tampering with, or destroying data; and addressing potential exculpatory evidence claims where, for example, a defendant claims that the government avoided its obligations by destroying data or returning it to a third party.

#### **Inventory and Return**

34. With respect to the seizure of electronic storage media or the seizure or imaging of electronically stored information, the search warrant return to the Court will describe the physical storage devices or media that were seized or imaged.

35. The government has made no prior effort in any judicial forum to obtain the materials sought in this requested warrant.

**Conclusion**

56. Based on the foregoing, I have probable cause to believe that **John MIDDENDORP** committed the **Target Offenses** and that evidence, fruits, and instrumentalities of those violations will be located on his person, including any cell phone on his person, and at the **Subject Premises** as described above and in Attachment A. I therefore respectfully request that the Court issue a warrant authorizing searches of **MIDDENDORP's** person, including any cell phone on his person, and the **Subject Premises** as described in Attachment A, for the items listed in Attachment B, and authorizing the examination and seizure of any such items found.

57. Prior to being submitted to the Court, this affidavit, the accompanying application, and the requested search warrant were all reviewed by Assistant United States Attorney (AUSA) Gary Sussman. AUSA Sussman advised me that in his opinion, the affidavit and application are legally and factually sufficient to establish probable cause to support the issuance of the requested warrant.

The male was wearing a black shirt and had a pair of black pants pulled down. The male had an erect penis almost laid out on top of the bathroom vanity. The male had a hair stomach area and was uncircumcised. This image was unsent by MIDDENDORP before I could document the image.]
